II. MINING AND RECLAMATION

1. Was the mine active during the past year? Yes ☒ No ☐
2. If active, how much ore or mineral was mined? 57,361 tons

3. Briefly describe any new or additional surface disturbances that occurred during the past year. This description should include the type of work performed, volume of material moved, and the acreage affected.

All mining operations were confined to approximately 50 acres. No new areas were mined. All mining is surface mining (upper 3 ft area). Oolitic sand is screened and washed. Total volume of material moved was 150,000 tons.

4. Briefly describe the reclamation work performed during the past year. This description should include acreage reclaimed, methods employed, and an evaluation of the results.

Mining areas along the shoreline of the Great Salt Lake have been reclaimed by the water. Areas inland were reclaimed using Standard reclamation procedures. Total area reclaimed was approximately 25 - 30 acres.

5. What was the total unreclaimed acreage at years end? 25 acres

6. Briefly summarize mining and reclamation planned for the upcoming year. Oolite mining will continue in the same area until mineable oolites are depleted. Areas North of existing sites will then be mined. Projected harvest for 1990 will approximate at 80 - 100,000 tons. Standard reclamation procedures will be adhered to.

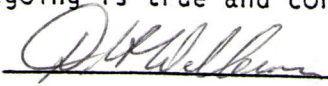

NOTE: Section III., "Additional Information" applies only to large mining operations.

III. ADDITIONAL INFORMATION

1. An updated surface facilities map should be attached if there have been significant changes since the previous map was submitted.
2. Any monitoring results or other reports that are required under the terms of the approved notice of intention should also be attached.

IV. SIGNATURE REQUIREMENT

I hereby certify that the foregoing is true and correct.
